

NANDHANA K S

Cybersecurity Researcher | Offensive & Defensive Security

Thrissur, Kerala, India | +91 9072221640 | nandhanaks321@gmail.com

LinkedIn | GitHub | Portfolio

Professional Summary

Cybersecurity researcher and trainer with hands-on experience across offensive and defensive security, including web and API security, vulnerability assessment, Active Directory, Android security, SOC operations, SIEM, and threat intelligence. Experienced in developing security labs, vulnerable applications, security platforms, and Python-based automation workflows. Seeking an industry cybersecurity role in security operations, application security, vulnerability assessment, or security engineering.

Technical Skills

Security: Web Security, API Security, VAPT, Active Directory Security, Android Pentesting, Network Security
SOC & Defense: SOC Operations, SIEM, Threat Intelligence, Incident Response, Security Monitoring, Wazuh, Splunk
Security Tools: Burp Suite, Nmap, Wireshark, Metasploit, Nessus, SQLmap, MobSF, JADX, Frida, Kali Linux
Development & Automation: Python, Flask, FastAPI, REST APIs, React, SQLite, Git, GitHub, Docker
Cloud & Identity: Microsoft Entra ID, IAM, Microsoft Defender, Azure Fundamentals

Professional Experience

Offenso Hackers Academy September 2025 – Present
Cybersecurity Researcher & Trainer Calicut, Kerala

- Conduct cybersecurity research and practical testing across web and API security, Active Directory, Android application security, vulnerability assessment, SOC operations, and emerging security technologies.
- Design and develop practical security labs, CTF challenges, attack-defense scenarios, and interactive simulations to provide hands-on cybersecurity learning experiences.
- Build realistic vulnerable web applications and controlled security labs, including *Back To Me*, to help students practice web and API security testing in realistic environments.
- Deliver practical training in offensive security, SOC operations, SIEM, threat intelligence, and VAPT using real-world attack and defense scenarios.
- Develop security platforms and Python-based automation workflows for cybersecurity education, threat-intelligence enrichment, and repetitive security tasks.

Kerala Police Academy January 2025
Cybersecurity Intern – 15-Day Internship Kerala

- Performed static and dynamic malware analysis using sandbox-based techniques to investigate malware behavior and indicators of compromise.
- Completed a practical project on *Malware Analysis Using Sandbox Technology*.

Selected Projects

MODUS – Cybersecurity Learning Platform React / Flask / SQLite / JWT

- Developed an interactive cybersecurity learning platform integrating security labs, CTF challenges, Linux practice, assessments, gamification, analytics, and structured learning modules.

Threat Intelligence Aggregator Python / VirusTotal / AbuseIPDB / Shodan

- Developed an automated IOC enrichment workflow integrating multiple threat-intelligence sources to support threat analysis and security operations.

WorkLedger – Productivity Tracking Application Python / Flask / SQLite / Web Application

- Developed a lightweight productivity tracking application to organize daily work activities, task progress, and time utilization through a centralized web interface.

Education

Indira Gandhi National Open University (IGNOU) Pursuing
Master of Computer Applications (MCA)

Bharathiar University 2025
B.Sc. Digital & Cyber Forensic Science CGPA: 8.3/10

Certifications

Microsoft Certified: Security, Compliance, and Identity Fundamentals (SC-900) Palo Alto Networks: Security Operations Fundamentals
EC-Council: Ethical Hacking Essentials (EHE) EC-Council: Network Defense Essentials (NDE)
EC-Council: Digital Forensics Essentials (DFE) Cisco Networking Academy: Introduction to Cybersecurity
